Date: 21 august 2022

Today I do meet with my colleges at Sanya Juu. We had a very good meeting and exchanged idea's in a positive way. HERE IS SUMMARY OF OUR MEETING

We agreed to have the following people as founders in Sanya Juu

1. Hans (coordinator)
2. Alex (The leader or Principal) Alex is a VTC graduate in Welding and fabrication
3. Samwel Mathias (Diploma in Civil Engineer)
4. Onai Mussa (Degree Mass communication)
5. Musa Singano (Senior car mechanics with experience in practical car repair)
6. Janet Oziniel (Tailor and cloth designer)

All of these members understand what needs to be done to make it work.

I In our meeting we agreed on the following disciplines:

1. Furniture and carpentry
2. Mechanics and car board painting
3. Driving school
4. Tailoring course
5. Welding and fabrication.

So we need to think about the building

1. FOUR Classrooms.
2. Furniture workshop
3. Garage for car repair, welding and gas fabricated area
4. Man hole for car examination and store
5. One shop outlet for selling small parts, oil, etc.

Challenges

1. To get equipment's (the request to the Dutch team to organize the logistics)
2. Land to build the facility (solved by getting a part of land from our grandpa)
3. Funds to build the classes and workshops. (This is challenge for me. I have to try how much money I can raise. Hopefully I get help from people who are also interested.)

The last discussion was about registration of the VTC. I talk to VTC representatives for Northern zone. This process continues and they will visit the site and give us guidelines of what to do during construction.
